

Hi, I'm **Miroslav Zeman** and I can lead your team to **Typescript world!**

About Me

Hey I'm Miro! I'm lead frontend developer doing full-stack more or less! If you are looking for a React master or want to build a complete API/client in Typescript, I'm here for you.

[#zerotomiro](#)

Education

ESCAPED THE HELL IN 2020

University of Ostrava

Master's Degree / IT Education

Skills

1. Design, develop, test and deploy entire applications like a god
 2. Teach, support or even recruit your entire frontend team
 3. Knows how to say "No." in a nice way for fucked-up ideas.
- Translation: Great soft skills

Experience

THE TRUE DEVELOPER CAREER BEGINS HERE

2016 – PRESENT

Frontend master and teacher for you!

TietoEvry

I have started as an intern and evolved into lead React developer. Now I'm building complete micro-frontend solutions for fintech. I have developed multiple applications in Java, C#, Typescript, configured various CI/CD, Docker tools and finally end up with mastering Typescript & React black magic.

- + I have built about 20+ React & Typescript applications.
- + I'm handling interviews (looking for a job?! [Linkedin!](#))
- + I'm a mentor in internship program for frontend developers

[#react](#) [#typescript](#) [#react-query](#) [#jest](#) [#vite](#) [#nx](#) [#azure](#) [#join-us](#)

ONE OF THE BEST STARTUP FEELINGS

2017

NodeJS & GraphQL architecture developer

Kvikymart

- + Developed serverless functions and micro-services running on Node.js using Typescript & GraphQL
- + Designed a serverless GraphQL gateway solution connecting multiple OpenAPIs together into single endpoint API

[#typescript](#) [#node](#) [#serverless](#) [#graphql](#) [#react](#) [#aws](#)

WHO KNOWS WHEN, IT WAS REALLY OLD TIMES

2012-2015

Student slave discovered PHP! Sad times...

A lot of e-shops for unnamed customers

- + Developed a ton of e-commerce solutions in Laravel framework and Wordpress with a ton of plugins (yet there were no performance issues, so big success! 🙌)
- + Understood the true meaning of "cheap human e-commerce generator".

Courses & Training

SINCE THE BEGINNING

The never-ending story!

Subscriber of Egghead, GitNation, Udemy and many more learning resources. Ditching Learning code since who knows when on Github (now with Copilot even faster than before) and reading tons of never-ending documentations all the time.

Awards & Honors

One production env down

Sometime bad things happen

Two test env down

Sometimes more than once

25+ released applications

But it's worth it in the end

Interests

Folk dancing

Moravia & wine cellars can corrupt you in a ways like you have never seen before.

Garage

Having shitty old car is pain at the beginning but later it's kinda fun.

Software development

Yeap, even in my own free time...

What roles I can fill for you?!

I'M FREAKING REACT WIZARD

6+ YEARS

Front-end lead developer

Let's build React app which doesn't sucks!

- + I can architect and develop entire React & Typescript solution from the scratch with innovative tech stack (already tried the old shitty one) and make a beautiful DX.
- + I can automate repetitive tasks with custom codegens and enforce good coding standards with various tools including custom eslint rules if needed.
- + Oh! I'm also supportive human being so team won't hate me.

#typescript #react #react-query #nx #jest #testing-library
#cypress #plop #hbs #vite #there-is-more

TYPESCRIPT – IT IS THE WAY

6+ YEARS

Full-stack senior developer

Let's build APIs and client from a scratch together!

- + It's a bundle. You get everything from above plus more!
- + I can architect and develop complete Web2 solutions using Typescript and even C# if really needed.

#typescript #nest #typeorm #postgres #jest #docker #ci/cd
#micro-services #mongo #redis #whatever-you-wish

#SOFT-SKILLS MATTERS

Interview / Consulting / Mentorship support

Don't worry. I know how to be kind to people too!

- + I can be your "devcruiter" and help you with hiring process.
- + I can help you hire developers who are skillful but also amazing people, so working with them won't be pain in the ass!
- + Do you have more than one team? I can help them as a consultant, propose changes, improvements and lead them to better DX!
- + I can be a mentor for your junior developers, so you won't have to hire bunch of senior developers all the time but slowly make them instead!

Miroslav Zeman

Your future co-worker

me@miroslavzeman.dev

linkedin.com/in/zero-to-miro

Czech Republic, Ostrava

Hi there my dev reviewer!

I'm gonna save you some time. You know how it works in your business, what people are you looking for and what kind of amazing/shitty processes are hiding on your project.

If you are looking for someone who you can count on. Someone, who takes responsibility for his and others stuff. Someone, who knows how to develop but also deliver on time without any shitty micro-management stuff and in a meantime supports and teach your team or use a spare time for a self-learning / improving current project. I'm your guy.

If you are looking for some stupid non-ambitious idiot who's gonna do a monkey work or will be micromanaged due some toxic culture shit... Just save your time and skip me. You will be looking for a new co-worker sooner than you think and it's gonna be wasted time for all of us.

So, now you know what to expect. Just make a choice!

Wish you luck and no bugs!

Miro
